Summary

category content, one topic at a time, for one or more info categories

What is it: Federal omnibus "Strong Borders" bill changing immigration and refugee rules, expanding border and policing powers, and revising anti–money-laundering and drug law.

Proponent's claim: Government says C-2 is needed to disrupt organized crime and fentanyl trafficking, strengthen border security, modernize enforcement tools and improve information-sharing while respecting Charter and privacy protections.

Neutral facts: Introduced June 2025; amends Immigration and Refugee Protection Act and related laws; adds strict time limits on many refugee claims; expands information-sharing and data-access powers between Canadian agencies and with foreign partners; strengthens enforcement at borders, in mail/parcel inspections and in financial monitoring.

INFO

Admin instructions:

Honk is a topic organizer that allows campaign leaders to break down issues and present phone scripts on a Wordpress site. In turn this allows citizen advocates to contact leadership with minimal preparation.
